

St. Vincent Hospital d/b/a Prevea Health
1727 Shawano Avenue, 2nd Floor – PO Box 19070
Green Bay, WI 54307-9070
PH: (920) 272-3336, FX: (920) 272-1053

Prevea Health's Clinical Research Program started as part of an independent Cardiology practice in 2001, and in 2008, merged with a very large multi-specialty, multi-site health system which serves patients from eastern Wisconsin and Upper Michigan. The Prevea Health system provides access to more than 225 physicians and over 150 Advanced Practice Providers in more than 60 specialty areas. We have conducted studies in Cardiology, Interventional Cardiology, Endocrinology, Obesity, Electrophysiology, Neurology, Pediatric Neurology, Gout, Imaging, and Ophthalmology. We do have the potential of conducting studies in many other areas as well, and are eager to expand. We have full-time, experienced, ACRP-certified study coordinators who are dedicated to our research program, and we also have a number of experienced PIs and SubIs. We have access to the EMR for all of the Prevea Health system as well as several hospitals, so we can run searches for specific patient populations.

We are a small, dedicated department within a very large health system. This allows us to give our studies and our patients the personal attention and flexibility that a small department can give, but also offer the robust patient population and amenities of a large system. We have had many compliments from study sponsors and CRAs regarding our physical site, attention to detail, professionalism, competence and proficiency.

Therapeutic areas (not inclusive):

- | | | |
|---------------------|-----------------------------|------------------------------|
| ❖ Cardiology | ❖ Interventional Cardiology | ❖ Neurology |
| ❖ Electrophysiology | ❖ Vascular Surgery | ❖ Pediatric Neurology |
| ❖ Internal Medicine | ❖ Endocrine/Metabolic | ❖ Plastic Surgery/Aesthetics |
| ❖ Obesity | ❖ Pediatric Cardiology | ❖ Dermatology |
| ❖ Neurosurgery | ❖ Family Practice | |

Research staff:

- Principal Investigators –
 - Aliaksandr Trusau, MD – Internal Medicine
 - Thomas J. Knutson, MD – Family Practice
 - James Hansen, MD, FACC, FHRS – Electrophysiology
 - Simil Gala, MD – Cardiology, Interventional Cardiology
 - Terence Edgar, MD, FAAP, FAANEM – Pediatric Neurology
 - Prasad V. Kanneganti, MD – Neurology
 - Hoon Choi, MD - Neurosurgery
 - Zhaowei Ai, MD, PhD, FACC – Cardiology, Interventional Cardiology
 - Kendra Marsh-Kates, MD, FACC – Cardiology, Heart Failure Specialist
 - John Hutto, MD, FACS – Vascular Surgery
- Sub Investigators – MDs, NPs, PA
- Study Coordinators – ACRP-certified CCRCs

Facilities and equipment:

- | | |
|---|------------------------------------|
| ▪ Centrifuge | ▪ Regular calibration of equipment |
| ▪ Refrigerator with min/max thermometer | ▪ High speed internet access |
| ▪ Non-frost 20 ° freezer with min/max thermometer | ▪ Wireless internet capabilities |
| ▪ Lab area for processing and sending | ▪ Fax and copy machine |
| ▪ ECG Machine | ▪ Imaging services available |
| ▪ Dry ice delivery | ▪ Long-term document storage |
| ▪ Min/max thermometers for all IP areas | ▪ Electronic Regulatory Binders |
| ▪ Secured area for IP and study documents | |

Other information:

- Phase II, III, IV, Registry and Device studies
- All research staff are current with GCP training
- All pertinent study staff are current with Hazardous Shipping training
- Central IRB preferred, local IRB available if necessary
- Proficient with a number of EDC systems
- VirTrial-certified virtual capable
- Site is a member of the Society for Clinical Research Sites (SCRS)
