

# Care for Your Eyewear

- To wash your prescription eyeglass lenses, gently rub your lenses with your fingers using warm, soapy water. Rinse and pat dry with a clean, soft cloth. Ultra-fine, machine-washable microfiber cleaning cloths that trap dirt and dust are available for purchase at Prevea Optical.
- Avoid rubbing prescription lenses with rags, facial tissues or paper towels, as they could scratch your lenses.
- Avoid using household cleaners, acetone or soaps with cream, as chemicals may damage your frames.
- Store your lenses in a sturdy, protective case when you are not wearing them to help prevent scratches. Proper storage helps keep prescription eyeglass lenses clean while protecting your valuable frames.
- Never place prescription glasses unprotected in a purse, pocket or bag.
- Extreme heat or cold can cause damage to your frames. Avoid leaving your glasses in direct sunlight or on the dashboard of your car.
- Eyeglasses can be adjusted and screws tightened at no charge at Prevea Optical.
