

# Prevea Health

1860 Shawano Avenue  
Green Bay, WI 54303

---

The Prevea Health Clinical Research Program is part of a large multi-specialty, multi-site, ambulatory healthcare system which serves patients throughout northern and eastern Wisconsin. The Prevea Health system has ~200,000 patients in its database and provides access to more than 450 physicians and mid-level providers in more than 60 specialty areas. We also partner with 4 hospitals across eastern Wisconsin. We have a number of experienced PIs and SubIs, and dedicated full-time, ACRP-certified (CCRC) study coordinators. We have access to the EMR for all of Prevea Health as well as our partner hospitals, so we are able to run searches for specific patient populations and easily view participants' medical records. We utilize the Compliance electronic Regulatory system. We are also VirTrial-certified virtual capable, and we are an active SCRS site.

We are a small, dedicated department within a very large health system. This allows us to give our studies and our patients the personal attention and flexibility that a small department can give, but also offer the robust patient population and amenities of a large system. We have had many compliments from study participants, Sponsors, CROs, auditors, and CRAs regarding our physical site, attention to detail, professionalism, competence, and proficiency.

## **Therapeutic areas (not inclusive):**

- |                             |                              |                   |
|-----------------------------|------------------------------|-------------------|
| ◆ Cardiology                | ◆ Endocrine/Metabolic        | ◆ Orthopedics     |
| ◆ Electrophysiology         | ◆ Obesity/Overweight         | ◆ Sports Medicine |
| ◆ Interventional Cardiology | ◆ Neurology                  | ◆ Rheumatology    |
| ◆ Family Practice           | ◆ Pediatric Neurology        | ◆ Dermatology     |
| ◆ Internal Medicine         | ◆ Neurosurgery               | ◆ Allergy/Asthma  |
| ◆ Vascular Surgery          | ◆ Plastic Surgery/Aesthetics | ◆ Neuropsychology |

## **Research staff:**

- Principal Investigators –
  - Aliaksandr Trusau, MD – Internal Medicine
  - James Hansen, MD, FACC, FHRS – Electrophysiology
  - Simil Gala, MD – Cardiology, Interventional Cardiology
  - Terence Edgar, MD, FAAP, FAANEM – Pediatric Neurology
  - Prasad V. Kanneganti, MD – Neurology
  - John Hutto, MD, FACS – Vascular Surgery
  - Michael Ryan, MD – Orthopedics and Sports Medicine
  - Jeremy Metzler, MD – Sports Medicine and Family Medicine
  - Anna Lim, MD - Internal Medicine
- Sub Investigators – MDs, NPs
- Study Coordinators – ACRP-certified CCRCs

## **Facilities and equipment:**

- |   |  |
|---|--|
| ▪ ECG Machine                               | ▪ Refrigerator with continuous datalogger        |
| ▪ Lab services with refrigerated centrifuge | ▪ Non-defrost 20° freezer w/ min-max thermometer |
| ▪ Neurodiagnostic services available        | ▪ Locked ambient closets w /min-max thermometer  |
| ▪ Imaging services available                | ▪ Dry ice delivery                               |
| ▪ Scale, stadiometer                        | ▪ Secured area for IP and study documents        |
| ▪ Regular calibration of equipment          | ▪ Fax and copy machine                           |
| ▪ High speed internet access                | ▪ Long-term document storage                     |
| ▪ Wireless internet capabilities            | ▪ Private area for monitors                      |
| ▪ Automated and manual BP cuffs             | ▪ Electronic Regulatory Binders                  |

## **Other information:**

- Phase II, III, IV, Observational, Pragmatic, Registry, and Device studies
- All research staff are current with GCP/HSP training
- All pertinent study staff are current with Hazardous Shipping training
- Central IRB preferred, local IRB available if necessary
- Proficient with a number of EDC systems
- VirTrial-certified / virtual trial capable
- Site is an active member of the Society for Clinical Research Sites (SCRS)
